

NUR IMAN BATRISYA BINTI MUHAMMAD HAZIQ

FRESH COMPUTER SCIENCE

(SOFTWARE ENGINEERING)

Address : Lenggeng, Negeri Sembilan
Email : imnbtrsya@gmail.com
Contact Number : +6018-3276009
LinkedIn : www.linkedin.com/in/nurimanbatrisya

Fresh Computer Science (Software Engineering) graduate with hands-on experience in mobile app development, web development, and machine learning. Developed various academic and practical systems, including a postgraduate management system, parking system, disaster management mobile app, workshop app, learning management system, and an early stroke prediction model with a simple UI. Skilled in software testing, software maintenance, and quality assurance, ensuring each system is reliable and user-focused. Highly motivated to contribute to real-world development projects and further develop technical expertise as a software engineer.

TECHNICAL SKILLS

- **Programming Languages:** Python, Dart, HTML, CSS, JavaScript, PHP
- **Frameworks & Libraries:** React.js, Laravel, Flutter, Bootstrap
- **Development & Design Tools:** Visual Studio Code, GitHub, Figma, Vite
- **Database Management:** MySQL, Firebase Firestore, PHPMyAdmin
- **Productivity Tools:** Microsoft Office (Word, Excel, PowerPoint), Google Workspace (Docs, Sheets, Slides), Canva
- **Other Skills:** UI/UX Design, Software Development, Software Testing, Software Maintenance, Quality Assurance, Machine Learning
- **Soft Skills:** Problem Solving, Time Management, Multitask, Teamwork & Collaboration

EDUCATION

Universiti Malaysia Pahang Al-Sultan Abdullah, Pekan, Pahang | CGPA: 3.21 **2022-2026**
Bachelor of Computer Science (Software Engineering) with Honours

Kolej Matrikulasi Negeri Sembilan, Kuala Pilah, Negeri Sembilan | CGPA: 3.54 **2021-2022**
Computer Science Stream

WORK EXPERIENCE

Web Developer (Intern), Vintedge Sdn Bhd **March - August 2026**

- Managed ticketing processes for both staging and production environments to support system operations.
- Updated and maintained website content using a Content Management System (CMS).
- Implemented front-end changes using HTML and integrated APIs (JSON) into web content.
- Performed data extraction and processing using Python for reporting and analysis.
- Performed content quality checks and testing before publishing updates to ensure accuracy and consistency.
- Assisted senior developers with front-end HTML, CSS, and JavaScript tasks.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- EF SET English Certificate (C2 Proficient)
- CCNAv7: Introduction to Networks

PROJECTS

Personal Portfolio Website – Personal Portfolio (React.js, Vite, JavaScript, HTML, CSS)

- Developed a responsive single-page portfolio website using React.js and Vite to showcase personal information, technical skills, projects, certifications, and contact details.
- Designed and implemented responsive layouts to ensure compatibility across desktop, tablet, and mobile devices.
- Deployed and published the project on GitHub for portfolio and project showcase purposes.

PawParent – Cat Sitting Service Website (React.js, Vite, Bootstrap, JavaScript, HTML, CSS)

- Developed a responsive website for a cat-sitting service to provide customers with information about available services, pricing, and service details.
- Built the website using React.js and Vite with reusable components for different sections of the application.
- Integrated WhatsApp booking functionality to allow customers to conveniently contact the service provider.
- Implemented interactive elements including service cards, navigation, sliders, and responsive mobile layouts.

MPScholar System – Postgraduate System (Laravel, PHP, CSS, JavaScript, PHPMyAdmin)

- Developed Expert Research Information module to manage expert profiles, including creating, viewing, editing, and deleting personal details, research, and publications.
- Implemented search functionality by keywords for users to quickly find relevant expert profiles.
- Enabled users to upload new researcher details and modify existing information securely.
- Prepared Software Requirements Specification (SRS) and Software Design Document (SDD) to guide system development and ensure proper documentation.
- Conducted system testing to ensure reliability and usability.

FK Park System – Parking System (HTML, CSS, JavaScript)

- Developed a Parking Summon module allowing Campus Security Officers to issue parking summons by filling in vehicle details, with automatic time and date based on the current system timestamp.
- Implemented QR code generation upon submission, enabling students to scan and view summon details instantly.
- Designed intuitive and user-friendly interfaces for both administrators and students.
- Conducted testing to ensure accurate data capture and reliable QR code functionality.

Learning Management System (Laravel, PHP, Firebase, HTML, CSS, JavaScript)

- Developed Discussion Forum module allowing users to post, comment, and interact with discussions.
- Implemented features for creating, viewing, and engaging in discussions to enhance learning collaboration.
- Conducted quality assurance testing to ensure functionality, usability, and reliability of the forum.
- Designed intuitive and user-friendly interfaces to encourage seamless communication among users.

Early Stroke Prediction System using Machine Learning Techniques (Python, Machine Learning)

- Developed a predictive system using K-Nearest Neighbours (KNN), Decision Tree, and Logistic Regression (LR) models to assess stroke risk.
- Evaluated model performance using accuracy, precision, recall, F1-score, with cross-validation, random sampling, and confusion matrix analysis.
- Designed and implemented a simple user interface for easy interaction and visualization of prediction results.
- Conducted data preprocessing, model training, and testing to ensure reliable and interpretable outputs.
